Education

Indian Institute of Information Technology, Sonapat

Bachelors of Technology in Information Technology (CGPA: 8.56)

Dec 2021 - Jun 2025

Sonapat, Haryana

Technical Skills

Programming Languages: C/C++, Python, Java

Frontend: HTML5, CSS3, JavaScript, React.js

Backend: Node.js, Express.js, RESTful APIs

Databases: MongoDB, SQL, MySQL

Version Control: Git

Coursework: Data Structures and Algorithms, Database Management System, Object-Oriented Programming

Work Experience

DARWIN (*React.js, Node.js, Express.js, MongoDB, RESTful APIs*)

Feb 2025 - Present

Full Stack Developer Intern

Remote

- Developed an AI-enhanced spreadsheet application with Excel-like functionality implementing natural language processing for advanced data analysis and business intelligence workflows
- Engineered automated data visualization features that intelligently select charts based on dataset characteristics with customizable styling and export options
- Optimized frontend performance through efficient state management for complex financial datasets

VENQ (*React.js, Node.js, Express.js, MongoDB, RESTful APIs*)

Dec 2024 - Feb 2025

Web Developer Intern

Remote

- Owned complete backend architecture development following security best practices and performance optimization guidelines
- Integrated Clerk authentication with custom hooks and MSG91 for OTP verification with failover mechanisms
- Implemented broker referral system with audit trails and customizable commission structures for different products
- Developed admin dashboard with export functionality and role-based access control features
- Built investment tracking system with historical data analysis and customizable reporting templates

Personal Projects

Code Collaboration Platform | *React, Express, WebSockets* (Aug 2024 - Dec 2024)

GitHub

- Built a real-time collaborative code editor supporting 4 languages (C++, Python, Java, JavaScript) using Monaco Editor with live syntax highlighting
- Integrated Piston API for secure server-side code execution with configurable timeout protection and memory limits
- Developed draggable real-time chat interface for seamless team communication during coding sessions
- Implemented Socket.io-based real-time synchronization enabling multiple users to code simultaneously with instant updates across all connected clients

Expense Management System | *MERN Stack* (May 2024 - July 2024)

GitHub

- Created an expense tracking system with category management
- Allow users to view transactions based on its category and its type
- Implemented data visualization for spending patterns and trends
- Implemented advanced filtering system allowing users to view transactions by date ranges, category, and transaction type for detailed expense analysis

Real-Time Chat Application | *React, Node.js, MongoDB* (Jan 2024 - Mar 2024)

GitHub

- Developed a full-stack chat application with JWT authentication and authorization
- Implemented real-time messaging using WebSockets with message persistence
- Added features for group chat creation, user management, and message search
- Designed responsive UI with themes and optimized performance for smooth messaging

Achievements

JEE Mains: Achieved 97.81 percentile, demonstrating strong understanding of scientific concepts.

Geeks for Geeks: Consistently ranked among top 10 coders from IIIT Sonapat
